## DENTAL IMPLANTS

**Pacific Smiles Dental offers patients the opportunity to replace lost or missing teeth with dental implants, the proven long-term solution for functionality and appearance. A beautiful smile can boost self-confidence and self-esteem and make a real difference to people's lives.**

Dental implants can be thought of as artificial roots that are securely anchored in the jaw. They are cylindrical devices made of medical grade titanium which are placed in the site of a missing tooth or teeth where they biologically bond with the bone and are capped with a ceramic crown that matches existing teeth.

#### **Dental implants are now widely used to:**

- **Replace** a single tooth (or many single teeth using one implant per tooth) with a ceramic crown secured to the top of the implant to give the appearance and function of a natural tooth.
- **Secure** a full or partial implant supported ceramic fixed bridge.
- **Retain** removable dentures to prevent movement and dramatically improve the ability of the denture wearer to chew and speak properly.

In experienced hands, dental implant surgery is now a routine and very successful dental procedure and is considered the best way to effectively replace missing teeth. Dental implants allow patients to regain what they have lost and enjoy improved appearance, function and quality of life. Dental implants provide 'new teeth' for people who have lost natural adult teeth.

You can make an appointment with one of the dentists at Pacific Smiles Dental for an implant consultation and written treatment plan or you can request a referral from your usual dentist.

The Pacific Smiles Dental implant team of experienced dentists and highly trained support staff deliver the very best in dental implant and crown procedures.

All procedures at Pacific Smiles Dental Centres are carried out using state-of-the-art equipment in modern, friendly facilities which offer the convenience of extended opening hours. Sterilisation and infection control practices at Pacific Smiles Dental are subject to the highest quality standards for the health and safety of patients, employees and practitioners.

Dental Implant procedures are available at selected Pacific Smiles Dental Centres by highly qualified and trained Practitioners.
